(54) Title: METHOD FOR IDENTIFYING A PERSON DRIVING A VEHICLE AND CONTROLLING DRIVING MANNER

(57) Abstract: A method to identify a person driving a vehicle and his/hers driving style and also to switch on the vehicle either to driving-allowing mode or on drive-stop mode, whereby in the method the vehicle comprises a card or another similar object containing data, a scanner, and the driver is provided with said data-containing card or with a similar object. In the method driving style information of the driver is stored on said card or object, and on starting driving the driver inserts the card or object into the vehicle scanner, whereby data received from selected vehicle controls and/or data from varying information-collecting detectors is compared with information stored on driver's driving style card and on basis of the comparison the control unit in the vehicle either allows driving or informs of drive-stop or of other consequence of that kind.
